چند نکته مهم

- مجموعه‌ای از مطالعات در مجله لانست در ۲۰۱۰ نشان داد که حدود ۲۰۰ میلیارد دلار (۸۵٪ هزینه کرد دنیا در تحقیقات پزشکی) برای مطالعاتی که طرح تحقیق آنها مشکل داشته یا تکراری و غیرضروری بوده یا هرگز نتیجه آنها منتشر نشده یا بد گزارش شده‌اند هدر رفته است.

(the Economist, 15 Mar 2014) (Ioannidis, 2014)

- میانگین استناد به آثار ایرانی در مقایسه با آثار کشورهای توسعه یافته کمتر است.
- ۵۸ درصد مقالات آی.اس.آی ایران در حوزه **علوم پزشکی**، فاقد ارجاع یا تنها دارای یک ارجاع هستند (رضا ملک‌زاده ۲۹ دی ۹۳، ایسنا)
- **خارجی‌ها به آثار ما خیلی استناد نمی‌کنند! علت چیست؟**

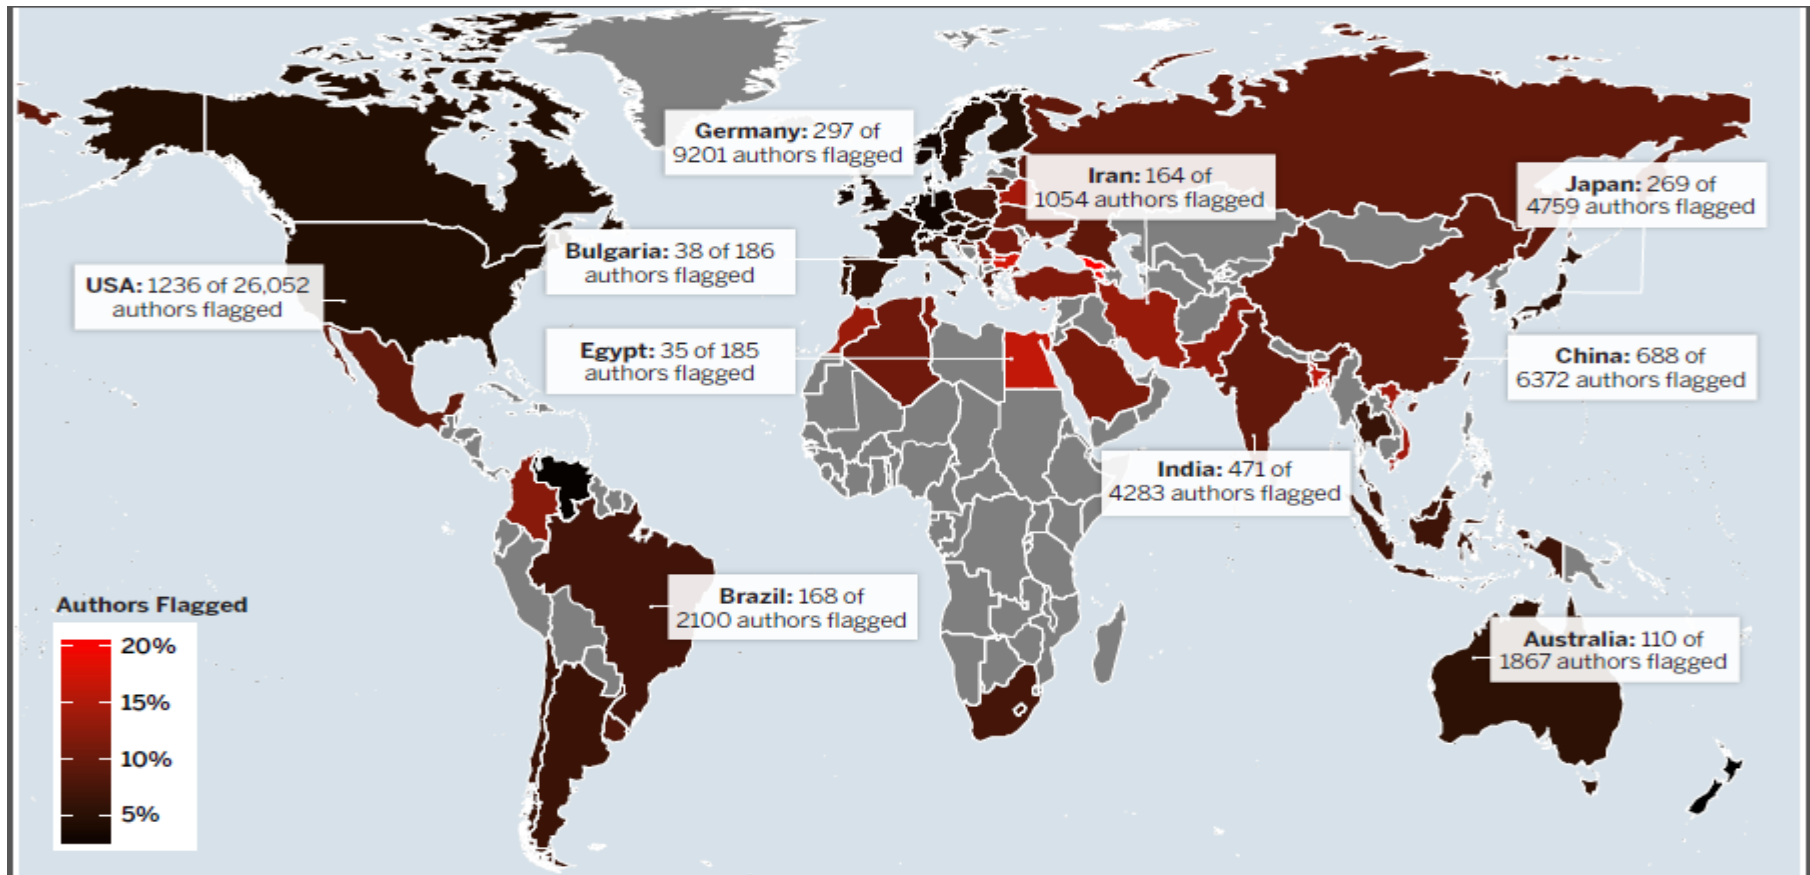

مقالات ایران در اسکوپوس: 300732

5 مجله اول

- 1- Life science journal: 2006 **(31)**
- 2- advance in environmental biology: 1950 **(30)**
- 3- Australian Journal of Basic and Applied Sciences: 1648 **(26)**
- 4- World Applied Sciences Journal: 1543 **(14)**
- 5- Pakistan Journal of Biological Sciences: 1422 **(39)**
 - متاسفانه همه اینها فاقد اعتبار و در بلك لیست هستند!

تحقیق نشان دادن سرقت علمی در آثار ایرانی ۲۰٪ بود

منبع: مجله ساینس

انتشارات دانشگاه فردوسی مشهد

1990-2015:
ISI:6424
scopus:9300

اعتبار 20 مجله دارای بیشترین مقاله منتشره دانشگاه

مجلات غارتگر (predatory journals)

بر اساس داده‌های اسکوپوس از میان ۳۰۰۷۳۲ مقاله‌ای که از ۱۹۹۰ تا تاریخ ۲۰ فروردین ۱۳۹۴ به اسم ایران در این پایگاه ثبت شده، ۱۶۴۸ مقاله در مجله‌ای با نام

Australian Journal of Basic and Applied Science

منتشر شده است، در حالی که یک بررسی سطحی روی این مجله نشاندهنده بی‌اعتباری آن بود. به عنوان مثال این مجله با وجود داشتن نام استرالیایی تنها یک نفر از استرالیا در هیئت تحریریه آن حضور داشت که آن اسم نیز اسمی جعلی بود و آن فرد وجود خارجی ندارد. در مدت شش سال ایرانیان مبلغ **۲۹۶۶۴۰** دلار برای انتشار مقاله‌هایشان به این مجله پرداخت کرده‌اند.

این مجله دیگر وجود خارجی ندارد!!!!!!

LIST OF PUBLISHERS

Beall's List:

Potential, possible, or probable predatory scholarly open-access publishers

This is a list of questionable, scholarly open-access publishers. We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. The criteria for determining predatory publishers are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geocultural locus. We emphasize that journal publishers and journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements.

About Global Impact Factor

The Global Impact Factor (GIF) provides quantitative and qualitative tool for ranking, evaluating and categorizing the journals for academic evaluation and excellence. This factor is used for evaluating the prestige of journals. The evaluation is carried out by considering the factors like peer review originality, scientific quality, technical editing quality, editorial quality and regularity.

We perform the in-depth analysis method. The acceptance and rejection rates of journals

Including references allows us to match more data points relevant to your manuscript

Find Journals >

How It Works

With a few key pieces of information—your title, abstract, and references—we can help you find the right journal for your manuscript.

Our patent—pending technology analyzes millions of data points and citation connections from the Web of Science to identify meaningful relationships between these publications and your own citation data.

Within seconds, you'll have JCR® data, key journal information and publisher details at your fingertips to help you compare your options and submit your manuscript.

Only Thomson Reuters can harness the power of Web of Science to support your manuscript publication decisions.

Q

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)

[Find out more about ResearcherID administrators](#)

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the Web of Science™ and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world! [Learn more](#)

My Publications: View

Add Publications

Use this list to display all the publications that you have authored.

Adding Publications to this list

You can add publications by searching *Web of Science™*, searching *Web of Science™ Core Collection*, using *EndNote®*, or uploading a file. To add publications, click the **Add** link located in the menu on the left-hand side of your screen, or by clicking on the **Add Publications** above.

* Note: Access to *Web of Science* and *Web of Science Core Collection* are based on the entitlements of the computer where you are accessing ResearcherID.

Please remember to only add publications that you have authored to this list. This list will be used by *Web of Science Core Collection* to create a Distinct Author Set, which is a set of papers that will be associated with your name, and your ResearcherID number will be displayed on the *Web of Science Core Collection* record. This allows *Web of Science Core Collection* users who find one of your papers on this list to find all of the other papers on this list.

Making the list public or private

You have the ability to make your "My Publications" public or private. If public, then visitors of ResearcherID can see your scholarly output, and your list will be sent to the *Web of Science* ([click here for more information](#)). Click on the **Manage Profile** button at the top-right corner of the page and select the Publication Lists tab to change the privacy settings of your data.
